

Print-at-Home Ring Sizer

Print at 100% / "Actual size" on US Letter or A4. Never use "Fit to page" or "Shrink to fit."

1 VERIFY YOUR PRINT

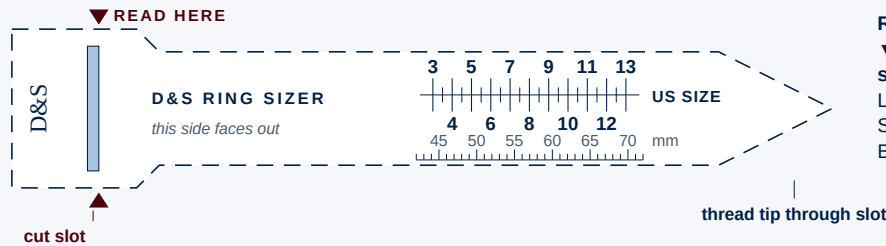

Hold any ruler against the bar below: from **0** to **100** it must measure exactly **100 mm (10 cm)**. If it doesn't, reprint with scaling set to 100%.

No ruler? A standard credit or ID card is 85.6 mm wide: its long edge should match this bar exactly.

A4 paper? Still print at 100%. The page edges may trim slightly; the scales stay true.

2 CUT-OUT STRIP SIZER

Reading the strip

▼ The reading edge is the **right edge of the slot**.

Long tick + number = whole US size.

Short tick = half size.

Bottom scale = finger circumference in mm.

How to measure

- 1 **Cut** out the strip along the dashed outline.
- 2 **Cut the slot.** Fold the head gently across the slot and snip, or use a craft knife, so it opens fully.
- 3 **Wrap** the strip around the base of your finger, printed scale facing out.
- 4 **Thread** the pointed tip through the slot.
- 5 **Pull snug:** comfortable, not tight. It should still slide over your knuckle.
- 6 **Read the number at the slot's right edge** (▼ **READ HERE**). Long ticks are whole sizes; short ticks are half sizes.
- 7 **Measure warm, at day's end**, when fingers are largest. Take two or three readings.
- 8 **Between sizes?** Choose the larger size.
- 9 **Wide bands run larger:** for bands 6 mm or wider, go up a half size.

Tip: the most reliable method, if you have a ring that already fits, is the circle sizer on page 2.

US ring sizes

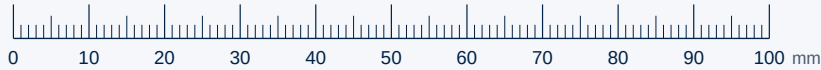

US SIZE	CIRCUMF. (mm)	DIAMETER (mm)
3	44.2	14.1
3½	45.5	14.5
4	46.8	14.9
4½	48.0	15.3
5	49.3	15.7
5½	50.6	16.1
6	51.9	16.5
6½	53.1	16.9
7	54.4	17.3
7½	55.7	17.7
8	57.0	18.1
8½	58.2	18.5
9	59.5	18.9
9½	60.8	19.4
10	62.1	19.8
10½	63.3	20.2
11	64.6	20.6
11½	65.9	21.0
12	67.2	21.4
12½	68.5	21.8
13	69.7	22.2

Inner diameter $d = 11.63 + 0.8128 \times \text{size}$; circumference $= \pi \times d$.

Ring Circle Sizer

Have a ring that already fits? This is the most reliable way to find its size.

✓ CHECK YOUR PRINT FIRST

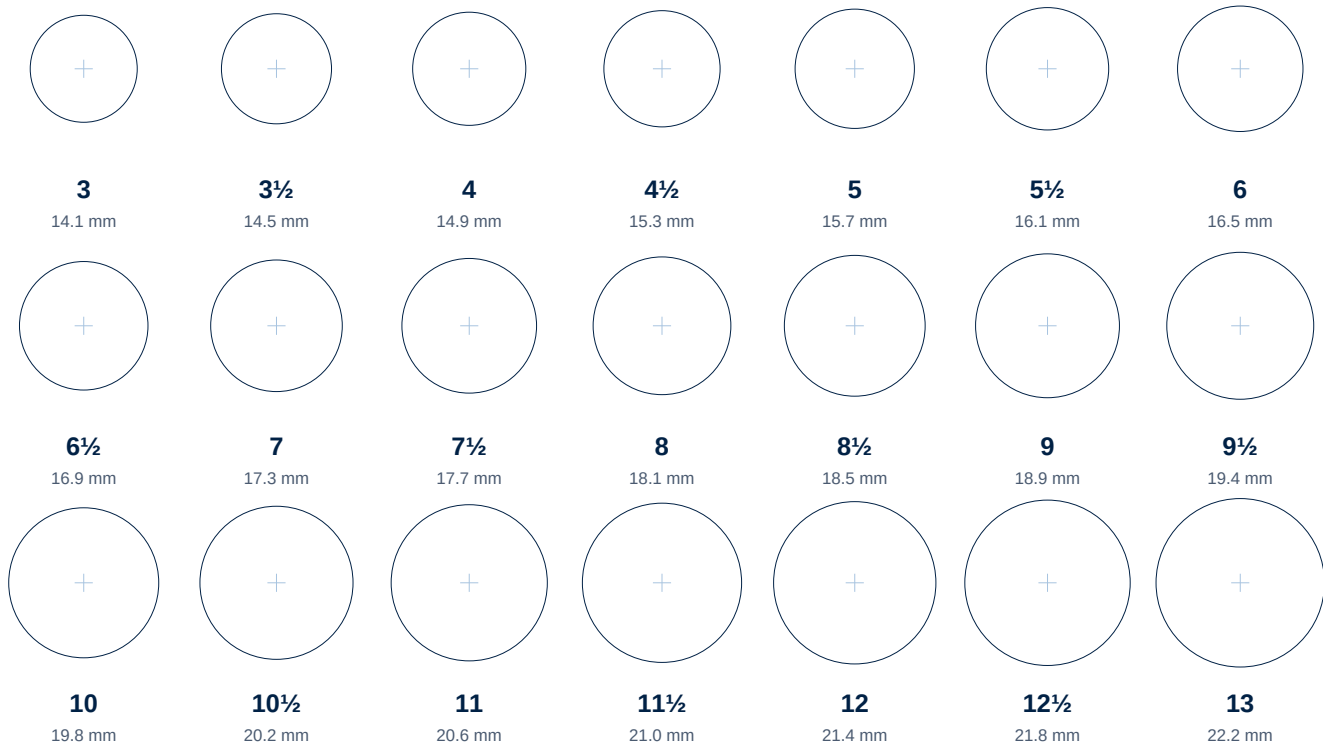

This bar must measure exactly **100 mm**. If not, reprint at 100% scale; the circles will be wrong otherwise.

How to use

- 1 Choose a ring that fits the intended finger well. Avoid bent or oval rings.
- 2 Lay it flat on the circles and slide it from circle to circle.
- 3 The match is the circle whose thin line **just shows inside the ring** all the way round: the line sits along the ring's inner edge, not hidden under the metal.
- 4 **Between two circles?** Choose the larger size.

Each circle's **inside edge** equals the inner diameter of that US size. Measure the inside of the ring, never the outside.

US sizes 3 to 13 in half sizes. Circle line = 0.25 pt; its inner edge is the true inner diameter.

Buying a gift?

Borrow a ring they wear on the same finger and hand, and match it here.

Knuckles matter.

If the knuckle is much wider than the base, choose the size that slides over it.

Not sure?

Email our concierge with the circle you matched; we are happy to help.
